

Well Test Application

Si prefiere leer en español, haga clic en la palabra "English" en la parte superior derecha de la pantalla. Luego, seleccione "Español" en el menú.

Valley Water Collaborative (VWC) helps people whose wells may have water with harmful levels of substances including nitrate, arsenic, 1,2,3-TCP, DBCP, EDB, perchlorate, total chromium, and uranium.

We offer free well testing. If the water in your well does not meet health standards, VWC can provide free replacement water to those who qualify.

Who Can Get Free Replacement Water?

You may qualify for free replacement water if:

- Your well has high nitrate levels.

OR

- Your well has high levels of other substances (like arsenic, 1,2,3-TCP, and others) AND you live in a disadvantaged community or are low-income.

If you need help with the application, call 209-750-3867 or email contact@valleywaterc.org. We are happy to help you!

This program is funded in part by a grant from the State Water Resources Control Board under the Safe and Affordable Funding for Equity and Resiliency (SAFER) drinking water program.

*** How did you learn about Valley Water Collaborative and our free water program?
Check all that apply.**

- Postcard in mail
- Neighbor, friend or family member
- Spoke to a VWC representative at my residence
- Spoke to a VWC representative at a booth, community meeting, or event.
- Road sign or store display/flyer.
- Facebook, Instagram, or other social media.
- Radio
- TV
- Newspaper
- School Flyer or Event
- Internet
- Other (please specify)

*** Applicant Information**

Important Information About Email: Valley Water Collaborative communicates mostly through email, including sending well test results. Please provide a valid email address. If you don't use email, write "none," and we'll reach out to you by phone or mail instead.

Language Preference

* Does the property have a domestic well that provides drinking water?

- Yes
- No, the property is connected to a Public Water System (I/my landowner receive a water bill and/or have a water meter).
- I'm not sure

* Are you the landowner?

Yes

No

*** Notice of Public Information**

* If your home qualifies for the program, results are required to be posted on the GeoTracker website. Posting this information is required by the Central Valley Regional Water Quality Control Board to inform water quality protection efforts for communities across the Central Valley. The website lists only the well address and results; no personal information about the owner or occupants will be posted. GeoTracker can be viewed at <http://geotracker.waterboards.ca.gov>. Here is an example of what you might see on the website:

A screenshot of the GeoTracker website interface. It shows a dark map with numerous red and blue dots representing wells. A white popup window is overlaid on the map, displaying a table of test results for a specific well. The table has columns for Chemical, PARVO, Result, Units, and Sample Date. The data shows two samples for Nitrogen, Nitrate-Nitrite, with results of 2.14 MG/L and 0.54 MG/L on different dates.

Chemical	PARVO	Result	Units	Sample Date
Nitrogen, Nitrate-Nitrite	=	2.14	MG/L	12/10/2020
Nitrogen, Nitrate-Nitrite	=	0.54	MG/L	10/21/2021

- I understand and would like to proceed with well testing.
- I need more information, please contact me.
- I would like to decline well testing

*** VWC needs permission from the landowner to do well testing. Would you like VWC staff to call or email the landowner, or would you like to connect with them yourself?**

- Yes, I'd like VWC staff to call or email the landowner.
- No, I'll talk to the landowner myself (VWC will give you a form to share with them).
