

Valley Water Collaborative

Free Well Testing

We are here to help!

The only way to know if your private well has safe drinking water is to test your well.

Most contaminants have no color, no smell and no taste.

Email us for assistance

**Apply online now at
valleywaterc.org**

How to apply

- Fill out our simple ONLINE APPLICATION or CALL US for help!
- We can fill out your application with you over the phone!
- Once approved, you will be contacted to schedule your free well water test.

What happens Next?

- **If nitrate levels are high:**
 - We'll set up delivery of FREE bottled water right to your door.
 - Bottle water delivery is available regardless of income level.
- **If we find other problems (not nitrate):**
 - Solutions are available through special grants.
 - Please note that residents must be located in a disadvantaged community or be low-income to qualify.
- **If both nitrate and other contaminants are found:**
 - We will set up the delivery of free bottled water right to your door.
 - Bottled water delivery is available regardless of income level.
